**ABSTRAK**  
Karya Ilmiah Akhir ini disusun sebagai laporan akhir dari praktik residensi ners spesialis keperawatan Maternitas yang berfokus pada penerapan teori keperawatan Konservasi Levin dan Comfort Kolkaba pada asuhan keperawatan pasien yang mengalami kanker serviks stadium IIIB. Tujuan penulisan pelaporan ini adalah untuk memberikan gambaran kegiatan tentang pelaksanaan praktik residensi Ners Spesialis Keperawatan Maternitas dengan fokus penerapan teori keperawatan Levine dan Comfort Kolkaba pada pasien dengan kanker serviks stadium IIIB dalam menjalankan perannya sebagai direct care provider, konselor, advokat, edukator, koordinator, kolaborator, komunikator, change agent dan peneliti. Aplikasi teori keperawatan Konservasi Levin dan Comfort Kolkaba efektif dilakukan pada lima kasus pasien dengan kanker serviks stadium IIIB. Teori keperawatan Konservasi Levin menjadi pilihan pada pasien dengan kanker serviks di ruang perawatan untuk memperbaiki keadaan umum pasien sesuai kemampuan adaptasi pasien terhadap konservasi energi, integritas struktural, integritas personal dan integritas sosial. Kenyamanan adalah kebutuhan dasar manusia oleh karena itu perawat menggabungkan teori konservasi Levine dengan kenyamanan Kolkaba pada tiga pasien kanker serviks stadium IIIB yang sudah dilakukan nefrostomi. Kata kunci: Asuhan keperawatan, kanker serviks stadium IIIB, teori keperawatan Levin, teori keperawatan Kolkaba

**ABSTRACT**  
Final scientific report of clinical practice maternity nursing specialist which focus on the application of Nurisng Theory Conservation Levin and Comfort Kolkaba in Nursing Care of patients with Cerviks cancer third stadium. xv 55 pages. 1 table 2 scheme 8 appendixes

**ABSTRACT**This final scientific paper is prepared as a final report of residency practice of nursing specialist of Maternity nursing which focuses on applying the nursing theory of Levin Conserve and Comfort Kolkaba on nursing care of patients who have cervical cancer IIIB. The purpose of this report is to provide an overview of activities on the implementation of residency practice Ners Maternity Nursing Specialist with a focus on the application of Levin and Comfort Kolkaba nursing theory in patients cervical cancer with stage IIIB in performing its role as a direct care provider, counselor, advocate, educator, coordinator, collaborator, communicators, change agents and researchers. Application of nursing theory Conservation of Levin and Comfort Kolkaba was effective in five cases of patients with stage IIIB cervical cancer. The Levin Conservation Nursing Theory becomes an option in patients with cervical cancer in the treatment room to improve the general state of the patient according to the patient 39 s ability to adapt the conservation energy, structural integrity, personal integrity and social integrity. Convenience is a basic human need therefore nurses combine Levine conservation theory with Kolkaba comfort in three patients with stage IIIB cervical cancer who have done nephrostomy.
