ABSTRAK

Penelitian ini dilakukan untuk mengetahui hubungan antara keberfungsian keluarga dan trust pada individu dewasa muda khususnya yang pernah diselingkuhi.. Pengukuran keberfungsian keluarga menggunakan Family Assessment Device FAD yang dikembangkan oleh Kabacoff, Miller, Bishop, Epstein, dan Keitner 1990 . Pengukuran trust menggunakan alat ukur Trust Scale yang disusun oleh Rempel, Holmes, dan Zanna 1985 . Partisipan penelitian berjumlah 309 individu usia dewasa muda dengan karakteristik memiliki pengalaman diselingkuhi. Hasil penelitian ini menunjukkan terdapat hubungan positif yang signifikan antara keberfungsian keluarga dan trust pada individu dewasa muda yang memiliki pengalaman diselingkuhi. Berdasarkan hasil statistik diperoleh nilai korelasi yaitu sebesar $r_{309} = 0,157$

ABSTRACT

The purpose of this study was to find correlation between family functioning and trust in young adults especially who have experienced infidelity. Family functioning was measured with Family Assessment Device FAD developed by Kabacoff, Miller, Bishop, Epstein, and Keitner 1990 . Trust was measured with Trust Scale made by Rempel, Holmes, and Zanna 1985 . Participants of this research were 309 young adults who have experiences with infidelity. The result obtained in this research shows that there is a significant positive correlation between family functioning and trust among young adults who have experiences with infidelity. The Pearson Correlation indicates positive significant correlation between family functioning and trust. Based on statistical result obtained correlation value of $r_{309} = 0.157$.
