## Abstrak

Penelitian ini bertujuan untuk mengukur, memonitoring dan mengevaluasi proses penyaluran zakat pada program Zakat Community Development salah satu program BAZNAS di desa Bringinsari Kec. Sukorejo Kabupaten Kendal Jawa Tengah dengan menggunakan Indeks Desa Zakat. Indikator Indeks Desa Zakat memiliki lima dimensi yaitu ekonomi, kesehatan, pendidikan, sosial dan kemanusiaan serta dakwah. Metodologi penelitian menggabungkan pendekatan kualitatif dan kuantitatif. Hasil dari penelitian ini menunjukkan dimensi ekonomi memiliki nilai indeks sebesar 0.32 dan nilai indeks dimensi kesehatan adalah 0.38 keduanya menempati nilai indeks terendah. Hal ini menunjukkan bahwa kondisi ekonomi dan kesehatan penduduk kurang baik. Kesimpulan Desa Bringinsari memperoleh total nilai indeks desa zakat sebesar 0.47. Hal ini menunjukkan bahwa kondisi desa dalam keadaan yang kurang baik. Sehingga berdasarkan nilai perhitungan tersebut, desa Bringinsari dapat diprioritaskan untuk dibantu dana zakat. Evaluasi dampak zakat pada program Zakat Community Development di Desa Bringinsari sudah baik. Keseluruhan nilai indeks pada indikator dampak zakat pada mustahik dan sesudah menerima dana zakat adalah 0,75 yang artinya dampak zakat sudah cukup baik.

.....This study aims to measure, monitor and evaluate the process of zakat distribution in the Zakat Community Development program, one of the BAZNAS programs in Bringinsari village, Sukorejo Subdistrict, Kendal Regency, Central Java using the Zakat Village Index. Indicators of Zakat Village Index have five dimensions economic, health, education, social and humanity and da 39 wah. The methodology used in this research is Mixed Methods Research, a research methodology that combines qualitative and quantitative approaches. Qualitative methods used in the form of interviews and observation. and the quantitative method used is Multi Stage Weighted Index that is by combining several process of weighting stages given to each component of index compiler, so that the weighting given to each component is done in stages and procedural by using Zakat Village Index IDZ , CIBEST and Development Index Human IPM . The results of this study indicate that the economic dimension has an index value of 0.32 and the index value of health dimensions is 0.38 both occupy the lowest index value. This indicates that the economic and health conditions of the population is less good. In summary, Bringinsari Village obtained a total value of zakat village index of 0.44. This indicates that the condition of the village is in poor condition. Therefore, based on the calculation value, Bringinsari village should be prioritized to be assisted by zakat funds. Evaluation of the impact of zakat on Zakat Community Development program in Bringinsari Village is good. The overall index value on the indicator of zakat impact on mustahik and after receiving zakat fund is 0.75 which means that the impact of zakat is good.
