Nama : Adi Gadang Wiratmoko
Program Studi : Magister Keselamatan dan Kesehatan Kerja
Judul : Analisis Risiko dan Business Continuity Plan pada Studi Kasus : Flood di PT X
Pembimbing : Dr. dr. Zulkifli Djunaidi, M.App.Sc
PT X merupakan perusahaan yang bergerak dalam bidang penyediaan dan pelayanan air bersih, dalam menjalankan operasional bisnisnya PT X sangat berisiko mengalami kerugian finansial maupun non finansial jika terjadi interupsi khususnya bencana alam, dalam studi kasus tesis ini adalah bencana banjir, untuk itu PT X telah menyusun rencana keberlangsungan bisnis untuk menghadapi bencana banjir. Analisis dilakukan dengan metode kualitatif, dengan melakukan diskusi kelompok organisasi dan observasi dokumen untuk mengkaji penerapan analisis risiko dan business continuity plan, studi kasus : Banjir di PT X. Pemenuhan rencana keberlangsungan bisnis business continuity plan dilakukan simplifikasi hanya pada tahapan Planning dan Do Implementation berdasarkan standar ISO 22301:2014 business continuity management system . Hasil penelitian menunjukkan bahwa dari aspek penilaian risiko, PT X telah melakukand identifikasi risiko, analisis risiko, evaluasi risiko dan pengendalian risiko dengan baik, namun belum dilakukan monitor, review dan update secara berkala terhadap risk register dan analisis dampak bisnis. Hierarki pengendalian berupa rekayasa engineering belum maksimal dan frame of thinking futures risk pada proses identifikasi risiko belum dilakukan. PT. X telah merencanakan sumber daya yang dibutuhkan pada saat terjadi bencana dengan baik dicerminkan dari pemenuhan semua klausul ISO 22301 : 2014 pada tahapan planning dan implementation, namun masih adanya inkonsistensi pada beberapa klausul, penilaian sumber daya belum disesuaikan dengan perubahan kondisi risiko serta kondisi lingkungan terbaru pada implementasi business continuity plan. Kata kunci: analisis risiko, business continuity plan, ISO 22301 : 2014.
