Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20478389&lokasi=lokal>

Abstrak

Apotek adalah sarana pelayanan kefarmasian tempat dilakukannya praktik kefarmasian oleh apoteker. Apoteker memiliki peran penting di apotek, yaitu pengelolaan sediaan farmasi dan pelayanan farmasi klinik. Untuk itu diperlukan pengetahuan dan pengalaman praktis seorang calon apoteker. Dengan adanya Praktik Kerja Profesi Apoteker PKPA yang dilaksanakan di Apotek Kimia Farma No. 49 ini, diharapkan calon apoteker dapat memahami tugas dan tanggung jawab apoteker dalam pengelolaan apotek dan praktik kefarmasian, serta memiliki gambaran nyata tentang permasalahan praktik kefarmasian. Dalam pelaksanaan praktik kerja profesi ini, dilaksanakan juga tugas khusus mengenai analisis pengkajian resep antihipertensi di apotek. Dengan begitu, diharapkan calon apoteker mampu memahami, mendapat pengetahuan dan keterampilan, serta mendapat gambaran nyata terkait permasalahan dalam melakukan analisis pengkajian resep antihipertensi di apotek.

Pharmacies are pharmaceutical care facilities where pharmaceutical practice is performed by pharmacists. Pharmacists have important roles in pharmacy, such as management of pharmaceutical preparations and clinical pharmacy services. Based on those important roles, pharmacist candidates are required to have knowledge and practical experiences. Internship at Kimia Farma 49 helped prospective pharmacist to understand duties and responsibilities of pharmacists in pharmacy management and pharmaceutical practices, obtain more knowledge and experiences to carry out pharmaceutical practices in pharmacies, and get the real point of view of pharmaceutical practice issues. In this professional work implementation, special assignment about analysis and assessment of antihypertensive prescriptions in pharmacies was also carried out. This specific assignment enabled prospective pharmacist to comprehend knowledge and skills, also understand issues in undertaking assessment of antihypertensive prescriptions in pharmacies.
