Abstrak

"New technologies have brought us many benefits, but they have also raised many social and ethical concerns. The authors view in Ethics for the Information Age is that we ought to approach every new technology in a thoughtful manner, considering not just its short-term benefits, but also how its long-term use will affect our lives. A thoughtful response to information technology requires a basic understanding of its history, an awareness of current information-technology- related issues, and a familiarity with ethics."--
