Abstrak

ABSTRAK

Penelitian ini mengamati hubungan antara konformitas dan perilaku prososial terhadap toleransi beragama remaja muslim di wilayah DKI Jakarta. Penelitian bersifat kuantitatif dengan metode pendekatan survei kuesioner yang dianalisis dengan menggunakan teknik Analisa Regresi. Kuesioner yang digunakan adalah kuesioner adaptasi Socio-Religious Tolerance, konstruk alat ukur Konformitas, dan kuesioner adaptasi Prosocial Tendencies Measure-Revised. Sampel penelitian adalah remaja muslim yang mengikuti kegiatan organisasi masyarakat yaitu Jama'ah Tabligh, FPI, dan Kelompok Tarbiyah. Pemilihan responden menggunakan teknik non probability dan convenience sampling dari tiga organisasi masyarakat di DKI Jakarta. Data primer yang diperoleh dari 300 responden ($n=300$) berusia 16-18 tahun. Penelitian dilakukan pada bulan Oktober hingga November 2018. Hasil penelitian secara simultan menunjukkan bahwa variabel-variabel independen yaitu konformitas dan perilaku prososial dengan uji F berpengaruh terhadap toleransi beragama. Hasil secara parsial dengan uji t menunjukkan bahwa, variabel konformitas dan perilaku prososial berpengaruh secara parsial terhadap toleransi beragama dengan tingkat signifikansi 10,23% dan 15,07%.
