Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20485492&lokasi=lokal>

Abstrak

ABSTRAK

Penelitian ini adalah untuk menganalisis determinan kinerja IPCN (Infection Prevention Control Nurse) terhadap faktor-faktor yang mempengaruhinya. Penelitian menggunakan tehnik deskriptif dengan mengambil sampel 90 IPCN yang bekerja di beberapa rumah sakit di Indonesia dan tergabung dalam Himpunan Perawat Pencegahan dan Pengendalian Infeksi (HIPPI). Peneliti menggunakan kuesioner online melalui google form, setelah itu penyebaran dilakukan melalui Whatsapp Goup. Kinerja IPCN berdasarkan hasil penelitian menunjukkan IPCN yang berkinerja kurang baik sebanding dengan IPCN yang berkinerja baik yaitu sebesar 50%. Penelitian ini juga menunjukan variabel yang paling berhubungan dengan kinerja IPCN

<i>ABSTRACT

This study is to analyze the performance determinant of IPCN (Infection Prevention Control Nurse) on the factors that influence it. The study uses descriptive techniques by taking a sample of 90 IPCNs who work in several hospitals in Indonesia and are members of the Infection Prevention and Control Association (HIPPI) Association. The researcher used an online questionnaire through google form, after that the distribution was done through Whatsapp Goup. The IPCN performance based on the results of the study shows that IPCN which performs poorly is comparable to that of IPCN which is performing well at 50%. This study also shows that the variables most associated with
