Abstrak

**ABSTRAK**

Status United Liberation Movement for West Papua (ULMWP) sebagai pengamat di Melanesian Spearhead Group (MSG) melambangkan pengakuan internasional dari negara-negara Melanesia. Berdasarkan tinjauan pustaka, tidak banyak penelitian yang mencoba mengeksplorasi respons Indonesia tentang internasionalisasi konflik Papua Barat, lebih khusus dari perspektif Indonesia. Penelitian ini bertujuan untuk menganalisis proses pemisahan diri dan pencegahan pengakuan entitas Papua Barat di ranah internasional oleh Indonesia. Untuk menganalisis fenomena ini, penulis menggunakan konsep kontra-pemisahan & pengakuan yang pendekatannya berasal dari perspektif liberalisme. Penelitian ini menemukan bahwa kegigihan dalam melindungi integritas nasionalnya dan banyaknya diplomasi yang dilakukan adalah kunci dari kurangnya dukungan internasional yang diberikan kepada entitas Papua Barat. Selain itu, tidak adanya dukungan dari negara-negara kekuatan utama meningkatkan peluang keberhasilan bagi Indonesia dalam mencegah pengakuan internasional terhadap entitas de facto.

**ABSTRACT**

The status of the United Liberation Movement for West Papua (ULMWP) as an observer in the Melanesian Spearhead Group (MSG) symbolizes international recognition from Melanesian countries. Based on a literature review, not much research has tried to explore Indonesia's response to the internationalization of the West Papua conflict, more specifically from an Indonesian perspective. This study aims to analyze the process of secession and prevention of recognition of West Papuan entities in the international sphere by Indonesia. To analyze this phenomenon, the author uses the concept of counter-separation & recognition whose approach is derived from the perspective of liberalism. This research found that persistence in protecting its national integrity and the amount of diplomacy undertaken is the key to the lack of international support given to West Papuan entities. In addition, the lack of support from major power countries increases the chances of success for Indonesia in preventing international recognition of de facto entities.
