Abstrak

ABSTRAK

Penelitian ini bertujuan untuk melihat hubungan antara variabel Online Disinhibition dan Religiositas terhadap perilaku perundungan siber. Variabel Online Disinhibition memiliki dua dimensi yaitu dimensi Benign Disinhibition dan dimensi Toxic Disinhibition. Responden penelitian merupakan 137 orang mahasiswa yang berdomisili di Jabodetabek. Instrumen pengumpulan data yang digunakan adalah kuesioner yang disebarakan secara daring. Hasil penelitian menunjukkan bahwa variabel Online Disinhibition khususnya dimensi Toxic Disinhibition memiliki hubungan yang signifikan terhadap perilaku perundungan siber, namun variabel Online Disinhibition dimensi Benign Disinhibition dan variabel Religiositas tidak memiliki hubungan yang signifikan terhadap perilaku perundungan siber.

ABSTRACT

This study aims to see the association among online disinhibition and religiosity toward cyberbullying perpetration. Online disinhibition has two dimensions which is Benign Disinhibition and Toxic Disinhibition. Respondents of this study is 137 college students located in Jabodetabek. The data collecting instrument is online questionnaire. Study result shows that only online disinhibition, especially toxic disinhibition, has significant effect on cyberbullying, however, benign disinhibition and religiosity doesnt have significant effect on cyberbullying.
