Abstrak

ABSTRAK

Penelitian ini membahas kelengkapan pengisian formulir persetujuan tindakan operasi di RSUD Koja Tahun 2018. Tujuan dari penelitian ini adalah untuk mendapatkan gambaran hasil analisis kelengkapan pengisian formulir persetujuan tindakan operasi. Jenis penelitian ini adalah mixed method dengan menggabungkan metode kuantitatif dan kualitatif. Penelitian kuantitatif dengan telaah dokumen formulir persetujuan tindakan operasi dan pengisian kuesioner oleh responden, penelitian kualitatif dengan wawancara mendalam. Hasil penelitian didapatkan rata-rata kelengkapan pengisian formulir persetujuan tindakan operasi RSUD Koja sebesar 76,54%. Hal ini menunjukkan bahwa kelengkapan formulir persetujuan tindakan operasi belum sesuai dengan standar RSUD Koja sebesar 100%. Hasil penelitian menunjukkan masih adanya perbedaan persepsi dalam pengisian formulir, kurangnya sosialisasi SPO, belum efektifnya pemberian umpan balik, belum ditetapkannya kelengkapan pengisian formulir persetujuan tindakan operasi sebagai standar kinerja individu, serta belum adanya sistem reward punishment. Hal tersebut dapat menjadi faktor yang mempengaruhi kelengkapan pengisian formulir persetujuan tindakan operasi di RSUD Koja.
