A pharmacist has an important role in the pharmaceutical industry, pharmacies, and government. Pharmacists must meet competency standards as a requirement for entering the workforce and undergoing professional practice. Indonesian pharmacist competency standards consist of ten (10) competency standards as abilities expected by pharmacists when they graduate and enter professional work practices. As a preparation and experience of prospective pharmacists to be able to understand the role of pharmacists and improve competence, the Pharmacist Professional Work Practices are implemented at PT Adventis Pharma, the Indonesian Food and Drug Supervisory Agency, and Kimia Farma Pharmacy during the January-April 2019 period. During PKPA, it is expected that pharmacists can expand their insight, understanding, and experience to do pharmacy work in the professional workplace.
