ABSTRAK

Deer's forked antlers orchid (*Phalaenopsis cornu-cervi* (Breda) Blume & Rchb.f) is one of endangered Indonesian orchid species which currently listed in Appendix II CITES. Conservation efforts that have been done in Bogor Botanic Gardens are including the collection through exploration, maintenance in the Orchid Collection Unit and in vitro propagation in the Tissue Culture Laboratory. This species has been acclimatized and cultivated in greenhouse of Tissue Culture Laboratories, Orchid Collection Unit, Orchidarium, and Griya Anggrek. As part of the conservation program, the plantlet has also been sold in Griya Anggrek and The Garden Shop to encourage community's enthusiasm and awareness on large diversity of Indonesian orchid.
