Abstrak

Penanaman Modal Asing (PMA) merupakan faktor yang penting bagi pertumbuhan ekonomi suatu negara. PMA dapat dibedakan menjadi penanaman modal langsung dan tidak langsung. Penelitian ini berfokus pada penanaman modal langsung, khususnya di bidang usaha jasa interkoneksi internet (NAP) di sektor telekomunikasi. Dengan relaksasi DNI melalui Paket Kebijakan Ekonomi XVI, diharapkan investasi asing di bidang jasa NAP dapat mengalami peningkatan. Terlebih karena pemerintah tengah menggalakan proyek Palapa Ring Broadband yang diharapkan dapat menyediakan koneksi internet yang baik hingga ke pelosok Indonesia. Penelitian ini menganalisis dampak relaksasi DNI terhadap investasi, khususnya asing, di bidang usaha jasa NAP.

.....Foreign Investment (FI) is an important factor for a country's economic growth. FI can be divided into direct (FDI) and indirect investment (FPI). This research focuses on direct investment, particularly in the field of network access point services (NAP) in the telecommunications sector. With the relaxation of DNI through the Economic Policy Package XVI, it is expected that foreign investment in NAP services increase. Especially because the government is promoting the Palapa Ring Broadband project which is expected to provide a good internet connection to all corners of Indonesia. This study analyses the impact of DNI's relaxation on foreign investment in the NAP service business.
