Abstrak

Berdasarkan Undang-Undang No 14 Tahun 2005 dalam melaksanakan tugas keprofesionalan, dosen, serta tenaga pendidikan berhak memperoleh rasa aman dan jaminan keselamatan. Pemerintah, pemerintah daerah, masyarakat, organisasi profesi, dan/atau satuan pendidikan wajib memberikan perlindungan terhadap dosen dalam pelaksanaan tugas. Perlindungan tersebut diantaranya adalah perlindungan keselamatan dan kesehatan kerja yang mencakup perlindungan terhadap risiko gangguan keamanan kerja, kecelakaan kerja, kebakaran pada waktu kerja, bencana alam, kesehatan lingkungan kerja, dan/atau risiko lain.

Penelitian ini bertujuan untuk menganalisis implementasi Keselamatan, Kesehatan Kerja, dan Lingkungan (K3L) di Universitas Indonesia dan National University of Singapore berdasarkan ISO 45001:2018.

Penelitian ini bersifat deskriptif dengan metode studi komparatif semi kuantitatif dengan pendekatan cross sectional.

Hasil penelitian menunjukkan adanya perbandingan antara Universitas Indonesia dan National University of Singapore. Universitas Indonesia dan National University of Singapore telah memenuhi persyaratan ISO 45001, terdapat 3 elemen yang memiliki perolehan skor tidak terpenuhi, sedangkan elemen lainnya memperoleh skor penilaian terpenuhi dan melebihi ekspektasi.

<hr><i>Based on Law Number 14 of 2015, while implementing professional responsibility, lecturer and teacher have rights to obtain security and safety. Government, local government, community, professional organization, and/or educational institution have to give safety to lecturer while on duty. The security is occupational health and safety security. The security of occupational health and safety includes the security of occupational safety disruption, working incident, working hours fire hazard, natural disaster, occupational health and environment, and/or the other risk.

The aim of this research is analysis of occupational health and safety implementation in Universitas Indonesia and National University of Singapore against ISO 45001. This study is a descriptive research with semi quantitative and qualitative method. The approach of the study is cross sectional.

The result of this research is a comparative implementation on occupational safety, health and the environment based on ISO 45001 in University of Indonesia, and National University of Singapore.

Universitas Indonesia and National University of Singapore have met ISO 45001:2018 requirements and there are 3 elements that have assessment scores review, while other elemets that have meet and exceed.</i>
