

Kausalitas mental accounting dan pengambilan keputusan investasi mesin produksi: suatu studi eksperimen

Fadlil Abdani, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20502885&lokasi=lokal>

Abstrak

ABSTRAK

Penelitian ini termasuk dalam true experiment yang bertujuan untuk menguji main effect maupun interaction effect variabel mental accounting dan self efficacy terhadap pengambilan keputusan investasi mesin produksi. Metode yang digunakan adalah true experiment, dengan desain 2×2 between subject yang menggunakan dua level kondisi mental accounting (ada atau tidak ada) dan dua level kondisi self efficacy (tinggi atau rendah). Uji statistik yang digunakan dengan Analysis of Variance (ANOVA), untuk hipotesis pertama dan kedua menggunakan One Way Analysis of Variance dan untuk hipotesis ketiga menggunakan Two Way Analysis of Variance. Hasil penelitian menemukan bahwa mental accounting terbukti berpengaruh terhadap pengambilan keputusan investasi mesin produksi. Self efficacy juga terbukti berpengaruh terhadap pengambilan keputusan investasi mesin produksi. Sementara efek interaksi antara mental accounting dan self efficacy tidak berpengaruh terhadap pengambilan keputusan investasi mesin produksi.

<i>ABSTRACT</i>

This research is included in the true experiment which aims to test the main effect and the interaction effect of mental accounting and self efficacy on investment decisions on production machinery. The method used is the true experiment, with the design of 2×2 between subjects that uses two levels of mental accounting (existing or absent) and two levels of self efficacy (high or low). Statistical tests are used with ANOVA, for the first and second hypotheses using One Way Analysis of Variance and for the third hypothesis using Two Way Analysis of Variance. The results of the study found that mental accounting proved to influence the investment decision making of production machinery. Self efficacy is also proven to have an effect on investment decisions in production machinery. While the interaction effect between mental accounting and self efficacy does not affect the investment decision making of a production machine.
