Abstrak

Penelitian ini bertujuan untuk menganalisis pengaruh penerapan pajak ekspor atas produk minyak sawit kasar (crude palm oil/CPO) apakah berdampak terhadap produksi CPO, kuantitas ekspor CPO, serta harga ekspor CPO di Indonesia. Kami menggunakan data time series bulanan selama 13 tahun (156 bulan). Hasil estimasi menunjukkan bahwa penerapan pajak ekspor walaupun berdampak positif terhadap produksi namun tidak signifikan. Pengaruh pajak ekspor terhadap volume ekspor juga tidak signifikan meskipun arahnya sudah sesuai teori yaitu mengurangi volume ekspor. Pajak ekspor signifikan berpengaruh positif terhadap harga ekspor CPO dari Indonesia.

.....This study aims to analyze the effect of the application of export taxes on crude palm oil (CPO) product which have an impact on CPO production, CPO exort quality, and CPO export price in Indonesia. We use monthly time series data for 13 year (156 month). The estimation results show that the application of export tax although positive for production but not significant. The effect of export tax on export volume is also insignificant even though the direction is in line with the theory of reducing export volume. The export tax has a significant positive effect on the price of CPO export from Indonesia.
