**ABSTRACT**

A pharmacist plays an important role in the pharmaceutical and pharmacy industry. Pharmacists must meet competency standards as requirements to enter the world of work and undergo professional practice. The competency standards for Indonesian pharmacists consist of ten competency standards as the abilities expected by pharmacists when they graduate and enter the professional work practice. As a provision and experience for prospective pharmacists to be able to understand the role of pharmacists and improve competence, the Professional Pharmacist Work Practice (PKPA) was carried out at PT Novell Pharmaceutical Laboratories and Apotek Atrika during the period February-April 2020. During PKPA, it is expected that prospective pharmacists can broaden their horizons, understanding, and experience to do pharmaceutical work in a professional work practice.
