ASBTRAK

Penelitian tentang kinerja perusahaan telah banyak dilakukan sebelumnya, begitu juga dengan manajemen pengetahuan, kinerja inovasi dan kapabilitas dinamis. Namun demikian, ketika kita melihat variabel-variabel tersebut dan aplikasinya di industri financial technology di Indonesia, yang masih tergolong baru dan berkembang secara pesat, fenomena tersebut menjadi menarik untuk diteliti. Hingga saat ini terdapat 161 perusahaan financial technology yang terdaftar dan berizin di Indonesia. Secara kolektif perusahaan-perusahaan financial technology tersebut menyumbangkan 25,92 triliun rupiah kepada kreditur di seluruh Indonesia. Penelitian ini bertujuan untuk menganalisis hubungan antara manajemen pengetahuan, kapabilitas dinamis dan kinerja inovasi terhadap kinerja perusahaan di industri financial technology di Indonesia. Dalam penelitian ini dilakukan survei dengan 60 responden dari berbagai perusahaan financial technology di Indonesia, dan data survei diolah dengan menggunakan partial least square structural equation modeling (PLS-SEM). Hasil penelitian menunjukkan bahwa manajemen pengetahuan, kapabilitas dinamis dan kinerja inovasi memiliki pengaruh yang positif terhadap kinerja perusahaan.
