Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20508768&lokasi=lokal>

Abstrak

Penelitian ini dilakukan untuk menganalisis karakteristik lokasi RPTRA berdasarkan *site* dan *situation*, serta untuk menganalisis intensitas, aktivitas dan persepsi pengunjung terhadap karakteristik lokasi RPTRA di Kecamatan Cakung. Metode penelitian ini menggunakan skoring dengan analisis komparasi dan spasial deskriptif. Analisis komparasi digunakan untuk membandingkan karakteristik lokasi RPTRA yang diteliti berdasarkan aspek *site* dan *situation*, analisis deskriptif digunakan untuk menjelaskan intensitas kunjungan, aktivitas di dalam RPTRA dan persepsi pengunjung terhadap karakteristik lokasi. Hasil dari penelitian ini yaitu karakteristik lokasi RPTRA yang paling dominan dengan tipe "Sangat Sesuai dan Cukup Baik bagi Anak" yang memiliki sarana dan prasarana yang sangat sesuai dan klasifikasi *situation* penggunaan tanah sangat baik, jenis jalan cukup mudah dan mudah, jarak dekat dan cukup dekat, serta waktu tempuh cepat dan sedang. Selain itu, tidak terdapat hubungan antara intensitas, aktivitas dan persepsi terhadap karakteristik lokasi RPTRA di Kecamatan Cakung, dikarenakan seluruh tipe karakteristik lokasi RPTRA di Kecamatan Cakung memiliki persepsi baik dari pengunjung, dan hanya terdapat dua tipe karakteristik lokasi RPTRA yang memiliki persepsi sangat baik dari pengunjung.

This research was conducted to analyze the characteristics of the RPTRA location based on the site and situation and to analyze the intensity, activity, and perception of visitors to the characteristics of the RPTRA location in Cakung District. This research method uses scoring with comparative analysis and descriptive spatial. A comparative analysis is used to compare the characteristics of the RPTRA location under study based on-site and situation aspects, descriptive analysis is used to explain the intensity of visits, activities in the RPTRA, and visitor perceptions of the characteristics of the location. The results of this study are the characteristics of the most dominant RPTRA location with the type "Very Suitable and Good Enough for Children" which has very suitable facilities and infrastructure and the classification of the land-use situation is very good, the type of road is quite easy and easy, the distance is close and quite close, as well as fast and moderate travel times. Besides, there is no relationship between intensity, activity, and perception of the characteristics of RPTRA locations in Cakung District, because all types of characteristics of RPTRA locations in Cakung District have good perceptions of visitors, and there are only two types of characteristics of RPTRA locations that have very good perceptions of visitors.
