Abstrak

Apoteker dalam industri farmasi memegang peranan penting agar obat yang dihasilkan bermutu, aman, dan berkhasiat. Kedudukan Apoteker yang diatur dalam CPOB yaitu sebagai penanggung jawab produksi, pengawasan mutu, dan pemastian mutu.. Calon apoteker wajib mengikuti praktik kerja profesi secara langsung di industri farmasi dan mengetahui gambaran umum mengenai permasalahan kefarmasian di industri farmasi. Tugas khusus yang diberikan berupa kualifikasi equipment. Tujuan dari tugas khusus ini adalah memahami proses kualifikasi serta tahapan pembuatan dokumen yang dibutuhkan selama proses kualifikasi berlangsung.

.....Pharmacists in the pharmaceutical industry have an important role so that the drugs produced are of good quality, safe, and efficacious. The Pharmacist's position is regulated in CPOB, namely as the person in charge of production, quality control, and quality assurance. Prospective pharmacists are required to follow professional work practices directly in the pharmaceutical industry and know an overview of pharmaceutical problems in the pharmaceutical industry. The special task given is equipment qualification. The purpose of this specific task is to understand the qualification process and the stages of document preparation needed during the qualification process.
