Mobile solutions and their usefulness in everyday life

Deskripsi Lengkap: https://lib.ui.ac.id/detail?id=20509264&lokasi=lokal

----

Abstrak

This book provides an insight into recent technological trends and innovations in solutions and platforms to improve mobility of visually impaired people. The authors goal is to help to contribute to the social and societal inclusion of the visually impaired. The books topics include, but are not limited to, obstacle detection systems, indoor and outdoor navigation, transportation sustainability systems, and hardware/devices to aid visually impaired people. The book has a strong focus on practical applications tested in a real environment. Applications include city halls, municipalities, and companies that must keep up to date with recent trends in platforms, methodologies and technologies to promote urban mobility. Also discuss are broader realms including education, health, electronics, tourism, and transportation. Contributors include a variety of researchers and practitioners around the world.;
