Abstrak

Apoteker merupakan salah satu tenaga kesehatan yang dapat berperan di berbagai bidang antara lain pemerintahan, apotek, dan industri. Pelaksanaan Praktek Kerja Profesi Apoteker (PKPA) dapat menjadi salah satu wadah bagi calon apoteker dalam meningkatkan kompetensi apoteker. Penulis melaksanakan Praktek Kerja Profesi Apoteker (PKPA) di Balai Besar POM Jakarta, Apotek Atrika, dan PT Bayer Indonesia – Cimanggis *Plant*. Tugas khusus PKPA di Balai Besar POM Jakarta adalah melakukan pengujian di Laboratorium Pangan. Tugas khusus PKPA di Apotek atrika adalah membuat rancangan apotek yang melayani Program Rujuk Balik (PRB) dengan cara studi literatur ke beberapa sumber antara lain website BPJS; website e-katalog LKPP; peraturan perundang-undangan tentang BPJS, JKN, Program Rujuk Balik (PRB); website PTSP di wilayah Surabaya. Tugas khusus PKPA di PT Bayer Indonesia – Cimanggis *Plant* dilakukan dengan membandingkan data pengujian kualitatif bahan baku pada catatan elektronik dan catatan kertas. Kegiatan PKPA di Balai Besar POM Jakarta, Apotek Atrika, dan PT Bayer Indonesia – Cimanggis *Plant* diharapkan dapat memberikan gambaran kepada calon apoteker mengenai peranan, tugas, maupun tanggung jawab apoteker dalam bidang pemerintahan, apotek, dan industri farmasi.

.....Pharmacists are one of the health workers who can play a role in various fields including government, pharmacy, and industry. The implementation of the Pharmacist Professional Work Practice (PKPA) can be a forum for prospective pharmacists to improve pharmacist competence. The author carried out the Pharmacist Professional Work Practice (PKPA) at Balai Besar POM Jakarta, Apotek Atrika, and PT Bayer Indonesia - Cimanggis Plant. PKPA's special task at Balai Besar POM Jakarta is to conduct tests at the Food Laboratory. PKPA's special task at the Pharmacy atrika is to design a pharmacy that serves the Referral Program (PRB) by studying literature to several sources, including the BPJS website; LKPP e-catalog website; laws and regulations regarding BPJS, JKN, Referral Program (PRB); PTSP website in Surabaya area. PKPA's special task at PT Bayer Indonesia - Cimanggis Plant is carried out by comparing qualitative test data of raw materials on electronic records and paper records. PKPA activities at Balai Besar POM Jakarta, Apotek Atrika, and PT Bayer Indonesia - Cimanggis Plant are expected to provide an overview to prospective pharmacists regarding the roles, duties, and responsibilities of pharmacists in the fields of government, pharmacies and the pharmaceutical industry.
