Abstrak

Apoteker memiliki peran penting di berbagai sektor yang meliputi apotek, rumah sakit, industri farmasi, distributor, dan sektor pemerintahan. Apoteker diharuskan untuk memenuhi standar kompetensi apoteker Indonesia yang terdiri dari sepuluh standar kompetensi ketika memasuki dunia kerja dan melaksanakan praktik profesi. Standar kompetensi tersebut merupakan kemampuan yang diharapkan dimiliki oleh apoteker ketika lulus dan menjalankan praktik kerja profesi apoteker. Selain ilmu yang memadai, seorang calon apoteker juga diharapkan memiliki bekal pengalaman dalam menjalankan praktik profesi apoteker. Oleh karena itu, dilaksanakan Praktik Kerja Profesi Apoteker (PKPA) di PT Harsen Laboratories dan Apotek Atrika selama periode bulan Februari – Agustus tahun 2020. Melalui PKPA ini, diharapkan calon apoteker dapat menambah wawasan mengenai praktik profesi apoteker di instansi terkait seperti industri farmasi dan apotek

.....Pharmacists have an important roles in various sectors which include pharmacy, hospital, pharmaceutical industry, distributor and government sector. Pharmacist is required to meet the competency standards of Indonesian pharmacist which consist of ten competency standards when entering the work and carrying out professional practices. This competency standards are the ability that pharmacist is expected to have when graduates and carry out the pharmacist's professional work practice. In addition to adequate knowledge, a prospective pharmacist is also expected to have experience in practicing the pharmacist profession. Therefore, the Pharmacist Professional Work Practice was carried out at PT Harsen Laboratories and Apotek Atrika during the period February - August 2020. Through this PKPA, it is hoped that prospective pharmacists can gain knowledge into the professional practice of pharmacists in related institutions such as the pharmaceutical industry and pharmacies
