Abstrak

Penelitian ini menganalisis dampak Dana Desa terhadap kesejahteraan masyarakat yang ditunjukkan oleh pengurangan jumlah penduduk miskin, peningkatan kesehatan dan peningkatan pendidikan. Untuk mengetahui dampak Dana Desa dilakukan analisis regresi terhadap tiga variabel yaitu rasio pra keluarga sejahtera, jumlah penderita gizi buruk dan angka partisipasi kasar sekolah. Dari ketiga model tersebut ditemukan bahwa Dana Desa mempunyai pengaruh untuk meningkatkan kesejahteraan masyarakat. Kebijakan supra desa masih banyak mengintervensi kewenangan desa sehingga otonomi desa tidak lagi berdasarkan hak asal usul dan adat istiadat.

This study analyzes the impact of the Village Fund on the welfare of the community as shown by the reduction of the number of poor people, the improvement of health and the improvement of education. In order to know the impact of Village Fund done regression analysis of three variables, namely the pre prosperous family ratio, malnutrition and school gross enrollment rates. From the three models it is found that Village Fund have influence to improve peoples welfare. The supra-desa policy still interferes with village authority so that village autonomy is no longer based on the right of origin and tradition.
