

Efforts in controlling vector and disease-carrying animals in Pesanggrahan Singkarak tourism area, Solok regency by using clean water and sanitation technologies

Asnah Rumiawati, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20512775&lokasi=lokal>

Abstrak

Either residential neighborhoods or the tourism area cannot be separated from vector and disease-carrying animals such as rats, flies, snails, mosquitos, etc. Vector and these animals are being potential as dangerous carrier and contaminator and needed to be countioned for example malaria, scarlet fever, chikungunya, philariasis (elephant's foot), etc.
