Abstrak

Pandemi COVID-19 merupakan fenomena yang memberikan dampak besar terhadap komunitas terutama sense of community (SOC) anggota komunitas. Penelitian ini bertujuan untuk melihat hubungan antara SOC terhadap resiliensi komunitas di masa pandemi COVID-19. Penulis berhipotesis bahwa terdapat hubungan yang positif dan signifikan antara SOC dan resiliensi komunitas sehingga komunitas yang resilien mampu beradaptasi selama pandemi. Pengambilan data menggunakan CCRAM dan SCI-2 kepada 165 partisipan yang merupakan anggota dari komunitas berbasis minat dan kegiatan. Hasil penelitian menunjukkan bahwa terdapat hubungan yang positif dan signifikan ($r=0,737$) antara SOC dan resiliensi komunitas pada komunitas berbasis minat dan kegiatan di masa pandemi COVID-19.

.....The COVID-19 pandemic is a phenomenon that has a major impact on the community, especially the sense of community (SOC) of community members. This study aims to investigate the relationship between SOC and community resilience during the COVID-19 pandemic. Researchers hypothesize that there is a positive and significant relationship between SOC and community resilience therefore resilient communities are able to adapt during a pandemic. There are 165 participants who are members of community of practice and interest that was carried out using CCRAM and SCI-2. The results showed that there was a positive and significant relationship ($r=0,737$) between SOC and community resilience in community of practice and interest during the COVID-19 pandemic.
