Abstrak

Perkawinan beda budaya merupakan perkawinan yang cenderung menguntungkan, karena perbedaan antara suami dan istri dapat menumbuhkan komitmen, penerimaan, dan mutual understanding yang kemudian dapat menghasilkan kepuasan perkawinan. Namun, wabah virus COVID-19 menghadirkan ancaman terhadap kepuasan perkawinan. Situasi pandemik yang menakutkan dan tidak menentu mungkin menimbulkan konflik dalam perkawinan, yang dapat diatasi jika pasangan memiliki trait kepribadian agreeableness. Selain itu, motif berkorban mendekat juga ditemukan berdampak positif bagi kepuasan perkawinan. Penelitian ini bertujuan untuk melihat peran dari agreeableness dan motif berkorban mendekat terhadap kepuasan perkawinan beda budaya di masa pandemik. Penelitian ini dilakukan terhadap 151 partisipan perkawinan beda budaya. Agreeableness diukur menggunakan instrumen Big Five Inventory-10 (BFI-10; Rammstedt & John, 2007), motif berkorban mendekat diukur menggunakan Motives of Sacrifice (MoS; Impett, Gable, & Peplau, 2005), dan kepuasan perkawinan diukur menggunakan Couple Satisfaction Index (CSI; Funk & Rogge, 2007). Hasil penelitian menunjukkan bahwa agreeableness dan motif berkorban mendekat secara simultan memprediksi kepuasan perkawinan dengan hubungan linear yang positif dan signifikan, namun kontribusi motif berkorban mendekat lebih besar daripada kontribusi agreeableness

.....Cross-cultur marriage is a marriage that tend to be profitable, because the cultural difference between husband and wife can foster commitment, acceptance, and mutual understanding which in turn can result in marital satisfaction. However, the COVID-19 virus outbreak presents a threat to marital satisfaction. The current pandemic situation that is frightening and uncertain may lead to conflict in the marriage, which can be resolved if the couple shows agreeableness personality trait. In addition, the approach motives of sacrifice has also shown positive impacts on marital satisfaction. This study aims to see the role of agreeableness and approach motives of sacrifice on marital satisfaction of cross-cultural couples during the pandemic. This study was conducted on 151 participants of cross-cultural marriage. Agreeableness was measured using the Big Five Inventory-10 (BFI-10; Rammstedt & John, 2007), approach motives of sacrifice was measured using Motives of Sacrifice (MoS; Impett, Gable, & Peplau, 2005), and marital satisfaction was measured using the Couple Satisfaction Index. (CSI; Funk & Rogge, 2007). The results showed that agreeableness and approach motives of sacrifice simultaneously predicted marital satisfaction with a positive and significant linear correlation, however, the contribution of approach motives of sacrifice is bigger than the

contribution of agreeableness.
