#### Abstrak

Ketidakamanan atas pekerjaan dan konflik pekerjaan-keluarga semakin lazim dialami dalam lingkungan pekerjaan yang dinamis, dan penelitian terdahulu telah mendokumentasikan konsekuensinya terhadap luaran pekerjaan. Penelitian ini mengintegrasikan peran faktor psikologis dalam menjelaskan hubungan tersebut dengan menganalisis persepsi karyawan yang menjalani pengaturan kerja fleksibel. Penelitian ini bertujuan untuk menganalisis pengaruh persepsi ketidakamanan atas pekerjaan, konflik yang disebabkan gangguan pekerjaan terhadap keluarga dan gangguan keluarga terhadap pekerjaan terhadap keterikatan kerja karyawan dan kinerja mereka melalui peran mediasi kesehatan psikologis karyawan. Data dari 578 karyawan dianalisis menggunakan metode Structural Equation Modeling (SEM). Hasil penelitian menunjukkan bahwa peningkatan persepsi ketidakamanan atas pekerjaan, konflik yang disebabkan gangguan pekerjaan terhadap keluarga dan gangguan keluarga terhadap pekerjaan dapat menurunkan kesehatan psikologis karyawan yang selanjutnya dapat berdampak pada keterikatan kerja karyawan serta kinerja mereka. Peningkatan kesehatan psikologis karyawan juga ditemukan dapat meningkatkan kinerja mereka melalui keterikatan kerja karyawan.

.....Job insecurity and conflict between work and family are increasingly prevalent in dynamic work environments, and previous research has documented their consequences for work outcomes. This study integrates the role of psychological factors in explaining this relationship by analyzing the perceptions of employees who are implementing flexible work arrangements. This study aims to analyze the effect of job insecurity, work-family conflict, and family-work conflict towards work engagement and job performance through the mediation role of psychological well-being. Data from 578 employees were analyzed using the Structural Equation Modeling (SEM) method. The results showed that increased perceptions of job insecurity, work-family conflict, and family-work conflict can reduce psychological well-being, which in turns can influence work engagement and job performance. Improved employees' psychological well-being was also found to improve their job performance through work engagement.
