Abstrak

Setiap manusia memiliki hak dasar kesehatan, dengan demikian hak asasi manusia tersebut perlu dikembangkan. Apoteker sebagai salah satu tenaga kesehatan wajib mengabdikan dirinya baik di apotek, industri farmasi maupun distributor farmasi. Dalam peningkatan pemahaman mengenai peran apoteker, maka dilakukan praktik kerja profesi apoteker di Apotek Safa, PT Harsen Laboratories dan PT Anugerah Pharmindo Lestari. Metode yang digunakan dalam pembuatan tugas khusus ini adalah melalui studi literatur, kunjungan langsung ke Kantor PTSP (Pelayanan Terpadu Satu Pintu) Kecamatan Tebet DKI Jakarta Selatan, pengerjaan di Laboratorium Quality Control Hormon PT Harsen Laboratories, serta tanya jawab dengan Branch Regulatory Quality Assurance (BRQA) PT Anugerah Pharmindo Lestari cabang Jakarta Distribution Center. Pada pelaksanaan praktik di apotek, penulis melakukan kegiatan perbandingan prosedur penutupan apotek di wilayah DKI Jakarta dan daerah lain di Indonesia. Terdapat persamaan dan perbedaan prosedur penutupan apotek di DKI Jakarta dan daerah lain di Indonesia. Pada pelaksanaan praktek di industri farmasi, penulis melakukan penetapan kadar dan keseragaman kandungan Estradiol Cypionate dan Medroxyprogesterone Acetate pada sediaan injeksi secara Kromatografi Cair Kinerja Tinggi (KCKT) dan hasil yang diperoleh yaitu memnuhi persyaratan spesifikasi kadar pada USP 43 (United States Pharmacopeia) tahun 2020. Sementara pada pelaksanaan praktik di distributor farmasi, penulisan melakukan saran untuk penambahan fitur scan barcode batch number product pada aplikasi zyllem untuk pemastian kesesuaian batch number product yang diterima customer. Penambahan fitur ini berguna untuk menghindari terjadinya perbedaan batch pada fisik produk dengan batch pada dokumen pengeluaran, serta untuk meningkatkan efisiensi dan keefektifan pembacaan batch number product.

.....Every human being has a basic right to health, thus those human rights need to be developed.

Pharmacists as one of the health workers must devote themselves both in pharmacies, pharmaceutical industry and pharmaceutical distributors. In increasing understanding of the role of pharmacists, the pharmacist professional work practice is carried out at Safa Pharmacy, PT Harsen Laboratories and PT Anugerah Pharmindo Lestari. The method used in making this particular task is through literature studies, direct visits to the PTSP office (Pelayanan Terpadu Satu Pintu) of Tebet District of DKI Jakarta Selatan, work on the Hormone Quality Control Laboratory of PT Harsen Laboratories, as well as a question and answer with the Branch Regulatory Quality Assurance (BRQA) of PT Anugerah Pharmindo Lestari Jakarta Distribution Center branch. In the implementation of practice in pharmacies, the author conducts comparative procedures for closing pharmacies in the DKI Jakarta area and other regions in Indonesia. There are similarities and differences in pharmacy closing procedures in DKI Jakarta and other regions in Indonesia. In the implementation of practice in the pharmaceutical industry, the author determines the levels and uniformity of Estradiol Cypionate and Medroxyprogesterone Acetate content in injection preparations in High Performance Liquid Chromatography (KCKT) and the results obtained are to meet the requirements of

level specifications in USP 43 (United States Pharmacopeia) in 2020. While in the implementation of practices in pharmaceutical distributors, writing does advice for the addition of barcode scan feature batch number product in zyllem application to check the suitability of batch number product received by customer. The addition of this feature is useful to avoid the occurrence of batch differences in the physical product with batches on the expense document, as well as to improve the efficiency and effectiveness of batch number product readings.
