Abstrak

Praktek Kerja Profesi Apoteker (PKPA) merupakan media yang sangat penting bagi mahasiswa profesi apoteker untuk menerapkan ilmu serta mengembangkan keahliannya dalam pekerjaan kefarmasian. Mahasiswa profesi apoteker dapat melaksanakan PKPA di Industri Farmasi, Pemerintahan (BPOM), Apotek, dan Distributor Farmasi. Salah satu peran apoteker sebagai Business Development di industri farmasi yaitu memberikan ide produk baru dan menyiapkan product knowledge produk. Peran apoteker di pemerintahan yaitu sebagai pengawas peredaran obat dan makanan di masyarakat, salah satu nya peredaran pada e-commerce. Di apotek, peran apoteker yaitu memberikan pelayanan kefarmasian dan melakukan pemberian informasi kesehatan kepada pasien, baik melalui media offline maupun online. Peran apoteker di distributor yaitu melakukan proses pengadaan, penyimpanan, hingga penyaluran obat. Kegiatan PKPA yang dilakukan bermanfaat sebagai bekal apoteker sebelum berkontribusi di dunia kerja kefarmasian.

.....Professional Practice of Pharmacists (PKPA) is a very important media for pharmacist students to implement their knowledge and develop their skills in pharmaceutical work. Pharmacist student can implement PKPA in Pharmaceutical Industry, Government (BPOM), Pharmacy, and Pharmaceutical Distributor. One of the pharmacist's roles as Business Development at the pharmaceutical industry is to provide new product ideas and prepare product knowledge. The role of pharmacist at government is to supervise drug and food distribution in the community, one of which is the distribution in e-commerce. At pharmacy, the role of pharmacist is to provide pharmaceutical services and provide health information to patients, both through offline and online media. The pharmacist's role at the distributor is to carry out the process of procurement, storage, and distribution of drugs. PKPA is useful as a provision for pharmacists before contributing to the pharmaceutical work.
