Abstrak

Studi ini bertujuan untuk meneliti pengaruh ukuran direksi, independensi direksi, dan keragaman direksi terhadap pengambilan risiko perusahaan pada perusahaan sektor perbankan di Indonesia periode 2016 hingga 2020. Sampel terdiri atas 43 perusahaan perbankan yang terdaftar di Bursa Efek Indonesia. Metode penelitian yang digunakan adalah regresi panel data dengan metode estimasi fixed effect model. Penelitian ini menemukan bahwa ukuran direksi memiliki pengaruh signifikan terhadap pengambilan risiko perusahaan perbankan di Indonesia. Namun, independensi direksi dan keragaman direksi tidak terbukti memiliki pengaruh signifikan terhadap pengambilan risiko perusahaan perbankan di Indonesia.

.....This study aims to examine the effect of board size, board independence, and board diversity on firm's risk taking in banking sector companies for the period 2016 to 2020. The sample consists of 43 banking companies listed on the Indonesia Stock Exchange. This research used panel data which was later run using fixed effect model data. This study find that board size has a significant impact on firm's risk taking in banking companies in Indonesia. However, board independence and board diversity have no significant impact on firm's risk taking in banking companies in Indonesia.
