Abstrak

Penelitian ini mengkaji kata slang komunitas pemain gim Korea dengan berfokus pada asal kata dan pembentukan kata. Penelitian ini dirancang untuk menjawab dua pertanyaan penelitian, yaitu bagaimana kata slang komunitas pemain gim Korea dalam komik digital Hadeukaeri diklasifikasikan berdasarkan jenis asal kata? dan bagaimana kata slang komunitas pemain gim Korea komik digital Hadeukaeri diklasifikasikan berdasarkan jenis pembentukan kata?. Sumber data penelitian ini adalah komik digital Hadeukaeri () episode 1-172. Penelitian ini menggunakan pendekatan kuantitatif dan kualitatif deskriptif. Hasil penelitian menemukan 115 kata slang pada sumber data. Klasifikasi data temuan berdasarkan jenis asal kata, terdapat 68 (59.1%) kata serapan, 35 (30.4%) kata campuran, 10 (8.7%) kata Sino-Korea, dan 2 (1.7%) kata asli. Klasifikasi data temuan berdasarkan jenis pembentukan kata, terdapat 44 (38.3%) akronim, 27 (23.5%) kata tunggal, 23 (20%) kata majemuk, 12 (10.4%) kata derivasi, 5 (4.3%) kata penggalan, dan 4 (3.5%) kata campuran. Dari hasil penelitian tersebut dapat disimpulkan bahwa klasifikasi kata berdasarkan asal kata didominasi oleh kata serapan, sedangkan klasifikasi kata berdasarkan pembentukan kata didominasi oleh akronim.

.....This study examines the slang words in the Korean gamer community by focusing on the study of word origin and word formation. This research is designed to answer two research questions, there are how are the Korean gamer community slang words in the Hard Carry webtoon classified based on the type of the word origin? and how are the Korean gamer community slang words in the Hard Carry webtoon classified based on the type of the word formation?. The data source of this study is the Hard Carry webtoon episodes 1 - 172. This research uses descriptive quantitative and qualitative methods. The results of this study found 115 slang words in the data source. The classification of the findings based on the type of word origin, there are 68 (59.1%) loan words, 35 (30.4%) hybrid words, 10 (8.7%) Sino-Korean words, and 2 (1.7%) native words. Classification of the findings based on the type of word formation, there are 44 (38.3%) acronyms, 27 (23.5%) single words, 23 (20%) compound words, 12 (10.4%) derivation words, 5 (4.3%) clipped words, and 4 (3.5%) blend words. From these results, it can be concluded that word classification based on word origin is dominated by loan words, while word classification based on word formation is dominated by acronyms.
