

Di balik kecenderungan pilihan pelaksanaan sekolah tatap muka di tengah Pandemi COVID-19 = The trend of doing offline learning amidst Pandemic of COVID-19

Ade Nurul Nabila, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20523107&lokasi=lokal>

Abstrak

Tulisan ini memuat penelusuran dibalik fenomena kecenderungan masyarakat dalam melaksanakan pendidikan secara tatap muka di tengah pandemi COVID 19. Pengambilan data dilakukan secara kualitatif dengan mengikuti kontroversi dan aktor-aktornya. Dengan menggunakan ANT (Actor Network Theory) penelitian ini berfokus pada tindakan-tindakan yang dilakukan oleh para aktor selama proses belajar dilaksanakan. Penulis berargumen bahwa anggapan anak-anak tidak belajar selama pendidikan jarak jauh adalah keliru secara empiris dan fenomena anggapan tersebut bisa terjadi karena tindakan-tindakan yang dilakukan para aktor tidak terlepas dari peranan non manusia seperti, kondisi tempat tinggal, teknologi smartphone serta pasar bebas.

.....This paper consists investigations behind the trend among the majority of people wanted offline learning amidst the pandemic of COVID 19. Data collection acquired through qualitative research by following the controversy and the actors. Using ANT (Actor Network Theory) the author focused the research examining the action of the actors during and related to learning process. The author argues that the assumption about children losing their time of learning due to online learning is fallacious. Nonetheless the assumption is the phenomenon that actually happened because of the doings of the actors that can't be separated with the other non-human actors such as the house atmosphere, technology, and the free market.
