## Abstrak

Praktik Kerja Profesi Apoteker (PKPA) merupakan salah satu kurikulum pembelajaran pada masa studi Apoteker, di setiap instansi dilaksanakannya PKPA mahasiswa apoteker diberikan tanggung jawab berupa tugas khusus yang kemudian akan dilaporkan ke universitas yang akan dijadikan sebuah syarat kelulusan. Pada Praktik Kerja Profesi Apoteker yang dilaksanakan penulis di Apotek Roxy merupakan gambaran penerapan kewajiban seorang Apoteker di Apotek, penulis diberikan tugas akhir berupa Pengkajian Obat-Obat Anti Tuberkulosis di Apotek Roxy Biak Periode September 2021, pelaksanaannya dilakukan dengan pengumpulan resep di Apotek Roxy Biak pada tanggal 1-25 September yang merupakan resep asli dan berisikan Obat Anti Tuberkulosis (OAT) kemudian dikaji secara administratif, farmsetik, dan klinis. Kemudian pada pelaksanaan Praktik Kerja Profesi Apoteker di PT. Finusolprima Farma penulis diberikan gambaran serta penerapan mengenai kewajiban seorang Apoteker di Industri Farmasi, penulis diberikan tugas khusus berupa Kajian Manajemen Risiko Mutu pada Proses Environment Monitoring menggunakan Metode FMEA. Pelaksanaannya dilakukan dengan mengkaji penyimpangan yang terjadi di area produksi Line 1 dan 4. Proses yang dikaji merupakan Kegiatan pemantauan lingkungan merupakan suatu kegiatan pemeriksaan parameter-parameter persyaratan kelas kebersihan di setiap ruangan tempat proses produksi dilakukan. Setiap parameter diperiksa untuk mengetahui kondisi ruangan saat proses produksi dilaksanakan (in operation) dan tidak dilaksanakan (at rest) dengan syarat yang telah ditetapkan oleh Cara Pembuatan Obat yang Baik (CPOB). Pada pelaksanaan Praktik Kerja Profesi Apoteker selanjutnya di Puskesmas Kecamatan ciracas penulis menyelesaikan tugas khusus yang berjudul Penyuluhan Suplemen yang Direkomendasikan Oleh Bpom Untuk Menghadapi Pandemi Covid-19 Di Puskesmas Kecamatan Ciracas Periode Desember 2021. Pelaksanaannya dilaksanakan dengan penyiapan kuesioner dan desain infografis berisi informasi penyuluhan, pada awal proses penyuluhan responden di arahkan untuk mengisi kuesioner yang sama dengan kuesioner yang akan diisi setelah penyuluhan. Kemudian penulis merekapitulasi naik atau turunnya pemahaman responden berdasarkan kuesioner yang telah diberikan.

.....Pharmacist Professional Work Practice (PKPA) is one of the learning curricula during the Pharmacists study period, in each institution implementing PKPA, pharmacist students are given responsibilities in the form of special assignments which will then be reported to the university which will be used as a graduation requirement. In the Pharmacist Professional Work Practice carried out by the author at the Roxy Pharmacy, it is an illustration of the application of the obligations of a pharmacist at the Pharmacy, the author is given a final task in the form of the Study of Anti Tuberculosis Drugs at the Roxy Biak Pharmacy for the September 2021 Period, the implementation is carried out by collecting prescriptions at the Roxy Biak Pharmacy on September 1-25 which is the original prescription and contains Anti Tuberculosis Drugs (OAT) and then reviewed administratively, pharmaceutically, and clinically. Then on the implementation of the Pharmacist

Professional Work Practice at PT. Finusolprima Farma the author is given an overview and application of the obligations of a pharmacist in the Pharmaceutical Industry, the author is given a special task in the form of a Quality Risk Management Study on the Environment Monitoring Process using the FMEA Method. The implementation is carried out by reviewing deviations that occur in the production area of Lines 1 and 4. The process being studied is an environmental monitoring activity which is an activity of checking the parameters for cleanliness class requirements in each room where the production process is carried out. Each parameter is checked to determine the condition of the room when the production process is carried out (in operation) and not carried out (at rest) with the conditions set by Good Manufacturing Practices (GMP). In the subsequent implementation of the Pharmacist Professional Work Practice at the Ciracas Sub-district Health Center the author completed a special task entitled Supplement Counseling Recommended by Bpom to Deal with the Covid-19 Pandemic at the Ciracas District Health Center for the December 2021 Period. The implementation was carried out by preparing questionnaires and infographic designs containing counseling information, on At the beginning of the counseling process, respondents were directed to fill out the same questionnaire as the questionnaire that would be filled out after the counseling. Then the author recapitulates the rise or fall of the respondent's understanding based on the questionnaire that has been given.
