The evaluation is carried out by assessing the suitability of all documents, tools, and techniques used during the PT MBHC PMO process for the PT MELV talent management transformation project against the characteristics of documents, tools, and techniques from the theory of the Project Integration Management monitoring and control process. Based on the evaluation results, there are several documents, tools, and techniques that are fully in accordance with the characteristics, not fully in accordance with the characteristics, and not in accordance with the characteristics of the theory. Afterwards, the self-reflection analysis is carried out by evaluating things that have and have not worked well from some of the author's experiences whilst doing the internship, associated with several relevant theories, and determine the follow-up of the results of the analysis.
