Abstrak

Telah dilakukan penelitian sebagai tugas khusus dalam Praktik Kerja Profesi Apoteker. Penelitian di RS Universitas Indonesia yaitu mengevaluasi penggunaan obat pasien Jaminan Kesehatan Nasional (JKN) di instalasi farmasi rawat jalan. Hasil didapatkan dari metode analisis ABC, dan disimpulkan bahwa pada pemakaian obat peserta JKN di rawat jalan terdapat 19 obat Fast Moving, 626 obat Slow Moving, dan 384 obat-obat dead stock. Praktik kerja di BPOM tentang peran apoteker khususnya di Direktorat Pengawasan Obat Tradisional dan Suplemen Kesehatan, yaitu melakukan pengawasan terhadap informasi dan promosi, fasilitas produksi dan distribusi, serta keamanan dan mutu dari obat tradisional dan suplemen kesehatan. Penelitian di Apotek Roxy Sawangan yaitu menganalisis data penjualan obat antihipertensi periode bulan Mei – Juli 2021. Hasil didapatkan bahwa amlodipine 5 mg merupakan antihipertensi dengan penjualan tertinggi. Penelitian di PT. Anugerah Pharmindo Lestari yaitu penambahan fitur pendaftaran klien pada aplikasi eZRX sebagai pengembangan digitalisasi yang dapat mempermudah klien maupun staff dalam proses pendaftaran.

.....Research has been carried out as a special task in the Pharmacist Professional Practice. Research at the Indonesia University Hospital is to evaluate the use of drugs for outpatients pharmacy installations with the National Health Insurance (JKN). The results were obtained from the ABC analysis method, and it was concluded that in the outpatient use of JKN participants' drugs there were 19 fast moving , 626 slow moving, and 384 dead stock of drugs. Work practices at BPOM regarding the role of pharmacists, especially in the Directorate of Supervision of Traditional Medicines and Health Supplements, namely supervising information and promotion, production and distribution facilities, as well as the safety and quality of traditional medicines and health supplements. Research at the Roxy Sawangan Pharmacy is analyzed data on sales of antihypertensive drugs for the period May – July 2021. The results showed that 5 mg amlodipine was the antihypertensive with the highest sales. Research at PT. APL is the addition of a client registration feature on the eZRX application as a digitalization development that can make it easier in the client registration process.
