Abstrak

Kegiatan Praktik Kerja Profesi Apoteker (PKPA) bertujuan agar mahasiswa profesi apoteker dapat melihat langsung aktivitas yang berlangsung dalam suatu industry farmasi dan juga sarana pelayanan kefarmasian (Apotek dan Puskesmas), memperoleh pengetahuan dan wawasan tentang penerapan CPOB di Industri farmasi dan praktek kefarmasian berdasarkan standar pelayanan kefarmasian, serta dapat memiliki pemahaman yang mendalam mengenai peran dan tugas apoteker baik di bidang industri maupun pelayanan. Tugas Khusus yang diberikan pada PKPA di Industri berjudul "Kualifikasi Konkuren Excel Spreadsheet Grup 7". Penyusunan tugas khusus ini bertujuan untuk mengetahui proses validasi dan kualifikasi di PT. SOHO Industri Pharmasi. Selanjutnya Tugas khusus yang diberikan pada PKPA Apotek berjudul "Pengkajian Resep Secara Administrasi, Farmasetis dan Klinis Pada Resep Program Rujuk Balik di Apotek Kimia Farma Burlian". Penyusunan tugas khusus ini bertujuan untuk mengetahui salah satu peran apoteker dalam pelayanan klinis di apotek yaitu pengkajian resep. Pada PKPA di Puskesmas tugas khusus yang diberikan berjudul "Monitoring Tingkat Kepatuhan Sarana Kefarmasian (Apotek) di Kecamatan Cipayung Terhadap Standar Pelayanan Kefarmasian" yang bertujuan untuk memahami salah satu peran apoteker dalam pengawasan, pengendalian dan pembinaan saranan pelayanan kefarmasian dalam penerapan standar pelayanan kefarmasian.

..... The Pharmacist Professional Work Practice (PKPA) activity aims to provide pharmacist students with firsthand experience of the activities that occur in the pharmaceutical industry as well as pharmaceutical service facilities (pharmacies and health centers), as well as knowledge and insight into the application of GMP in the pharmaceutical industry and pharmaceutical practice based on service standards, and have a thorough understanding of pharmacists' roles and responsibilities in both industry and service sector. In Industry, PKPA was given a special assignment titled "Concurrent Qualification of Excel Spreadsheet Group 7." This special task is being prepared in order to determine the validation and qualification process at PT. SOHO Pharmaceutical Industry. Furthermore, PKPA at Pharmacy has been assigned the special task of "Administrative, Pharmaceutical, and Clinical Prescription Assessment in the Referral Referral Prescription Program at Kimia Farma Burlian Pharmacy." This special task's preparation aims to determine one of pharmacists' roles in clinical services in pharmacies, namely prescription assessment. A special task entitled "Monitoring the Compliance Level of Pharmaceutical Facilities (Apotek) in Cipayung District Against Pharmaceutical Service Standards" was assigned at the PKPA at Puskesmas, with the goal of understanding one of the roles of pharmacists in monitoring, controlling, and fostering pharmaceutical service advice in the application of pharmaceutical service standards.
