Abstrak

Apoteker merupakan profesi yang didapatkan seorang sarjana farmasi setelah lulus dari program pendidikan profesi apoteker dan lulus Ujian Kompetensi Apoteker Indonesia (UKAI). Seorang apoteker selanjutnya dapat berkarir di industri (obat, obat tradisional, kosmetik), pedagang besar farmasi (PBF), apotek, rumah sakit, puskesmas, maupun klinik. Sebagai perbekalan calon apoteker untuk terjun ke dunia kerja kedepannya, dilaksanakan Praktik Kerja Profesi Apoteker (PKPA) sebagai bagian dari kurikulum program studi profesi apoteker. PKPA dilaksanakan di PT Mahakam Beta Farma pada periode Januari – Februari 2022 ditempatkan di divisi Pemastian Mutu dan Apotek Roxy Pitara periode Mei 2022. Saat melaksanakan PKPA di PT Mahakam Beta Farma, calon apoteker berfokus pada bagian dokumentasi, terutama pembuatan Product Quality Review (PQR). Kemudian, saat melaksanakan PKPA di Apotek Roxy Pitara, calon apoteker belajar bagaimana melakukan pengelolaan sediaan farmasi, alat kesehatan, dan Bahan Medis Habis Pakai (BMHP) serta melakukan pelayanan farmasi klinik. Calon apoteker diharapkan dapat belajar dan mendapatkan pengalaman, pengetahuan, serta keterampilan yang dapat mendukung calon apoteker tersebut kedepannya lewat PKPA di industri dan apotek.

.....A pharmacist is a profession that is obtained by a pharmacy graduate after graduating from the pharmacist professional education program and passing the Indonesian Pharmacist Competency Examination (UKAI). A pharmacist can then have a career in industry (drugs, traditional medicines, cosmetics), pharmaceutical wholesalers (PBF), pharmacies, hospitals, health centers, and clinics. As provision for prospective pharmacists to enter the world of work in the future, the Pharmacist Professional Work Practice (PKPA) is carried out as part of the pharmacist profession study program curriculum. PKPA was implemented at PT Mahakam Beta Farma in the period January – February 2022 placed in the Quality Assurance division and Roxy Pitara Pharmacy for the period May 2022. Prospective pharmacists focus on the documentation section, especially the manufacture of Product Quality Review (PQR) at PT Mahakam Beta Farma. Then, prospective pharmacists learn how to manage pharmaceutical preparations, medical devices, and Medical Consumables (BMHP) and perform clinical pharmacy services at Roxy Pitara Pharmacy. Prospective pharmacists are expected to learn and gain experience, knowledge, and skills that can support future pharmacists on their next journey through PKPA in industry and pharmacy.
