Anthropology - based computing: Putting the human in human-computer interaction

Brown, John N. A., author

Deskripsi Lengkap: https://lib.ui.ac.id/detail?id=20528453&lokasi=lokal

----

Abstrak

This book is an attempt to share the thinking that went in to developing a new theory of how interaction with computers should be designed. As a result, the reader will be presented with information coming from a wide variety of fi elds. This work offers an overview of those fi elds, pulling up some details from one or the other in turn, but not the incisive and defi nitive work of an expert.
