

How to write your first thesis

Gruba, Paul, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20528517&lokasi=lokal>

Abstrak

This isn't our first book on thesis writing; we are also the authors of the companion volume, *How to Write a Better Thesis*, originally written by David Evans and published in 1995, and revised by us in 2003 and 2011. That book is primarily intended for senior research students undertaking a thesis across a period of years. In writing this new book, we focus solely on first theses. Although we have relied on content from the other volume (from which about half of this book is taken), we have observed that the challenges of writing a minor thesis, especially given the time and resource constraints, are very different. Another factor is that senior research projects such as PhDs take a range of forms, whereas a minor thesis is—and should be—the product of a more or less standard approach. Our goal here is to help guide you through your first piece of substantial research.
