

Intelligent techniques for data science

Akerkar, Rajendra, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20528526&lokasi=lokal>

Abstrak

Computational intelligence skills, which embrace the family of neural networks, fuzzy systems, and evolutionary computing in addition to other fields within machine learning, are effective in identifying, visualizing, classifying, and analysing data to support business decisions. Developed theories of computational intelligence have been applied in many fields of engineering, data analysis, forecasting, healthcare, and other. This text brings these skills together to address data science problems.
