

"Factory outlet" budaya produksi dan produksi budaya

Hianly Muljadi, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=68887&lokasi=lokal>

Abstrak

This article examines factory outlet as a cultural phenomenon in Indonesia. It specifically focuses in the shift in FO meanings. Through observation, bibliographic study and critical critique, it is shown that FO has been perceived differently from a place to get "branded products" for the lower middle class in order to increase their social status to a shopping heaven for the upper class.
