Abstrak

Penerapan analisis komponen utama dalam menelaah struktur ruang di Kota Depok menghasilkan tiga kelompok wilayah yaitu usaha tani di sebelah barat Ciliwung, pelayanan dan industri atau perumahan yang tersebar di bagian utara.

<hr><i>This paper uses data from the 1999 village potential (potensi desa) to examine and measure the spatial structure. Eleven variables are analysed by principal component analysis. This study identified three types of scores of the first component, namely farmland region in the western part of the Ciliwung river, commercial activity and industrial or settlement region in the northern part of Depok Area.</i>
