Abstrak

Latar Belakang : Special Care Dentistry merupakan salah satu cabang spesialisasi Kedokteran Gigi yang berfokus dalam memberikan perawatan kepada individu dengan disabilitas dan membutuhkan perawatan serta penanganan khusus. Guna memberikan perawatan yang maksimal, sikap dan persepsi dari operator selaku pemberi pelayanan merupakan salah satu faktor krusial. Oleh sebab itu, studi mengenai sikap dan persepsi mahasiswa Kedokteran Gigi Universitas Indonesia, Universitas Can Tho, dan Universitas Khon Kaen perlu dilakukan. Tujuan : Mengetahui sikap dan persepsi mahasiswa Fakultas Kedokteran Gigi Universitas Indonesia, Universitas Can Tho, dan Universitas Khon Kaen terhadap Special Care Dentistry. Metode : Penelitian ini menggunakan selfadminisered questionnaire dengan memanfaatkan google form di 2021 kemudian diolah menggunakan perangkat lunak statistik SPSS pada tahun 2022 dengan menggunakan uji mann whitney, kruskal wallis, dan chi-square. Hasil Penelitian : Didapatkan total responden mahasiswa sebanyak 471 dari Universitas Indonesia, Universitas Can Tho, dan Universitas Khon Kaen angkatan 2016-2018 dengan response rate 70%. Sebanyak 71,5% responden dapat mendefinisikan Special Care Dentistry dengan 66,9% merasa membutuhkan pembelajaran didaktik maupun 94,3% responden merasa dibutuhkannya pelatihan klinis mengenai Special Care Dentistry guna menunjang pelayanan. Kesimpulan : Mahasiswa Kedokteran Gigi Universitas Indonesia, Universitas Can Tho, dan Universitas Khon Kaen memiliki sikap dan persepsi yang baik terhadap individu pasien dengan disabilitas.

.....Background: Special Care Dentistry is a specialty branch of Dentistry that focuses on providing care to individuals with disabilities who require special care and treatment. In order to provide maximum care, the attitude and perception of the operator as a service provider is one of the crucial factors. Therefore, it is necessary to conduct a study on the attitudes and perceptions of Dentistry students at the University of Indonesia, Can Tho University, and Khon Kaen University. Objective: To find out attitudes and perceptions of students of the Faculty of Dentistry, University of Indonesia, Can Tho University, and Khon Kaen University towards Special Care Dentistry. Methods: This study used a selfadministered questionnaire by utilizing the Google form in 2021 and then processed using the SPSS statistical software in 2022 using the Mann Whitney, Kruskal Wallis, and Chisquare tests. Research Results: A total of 471 student respondents were obtained from the University of Indonesia, Can Tho University, and Khon Kaen University class of

2016-2018 with a response rate of 70%. As many as 71.5% of respondents can define Special Care Dentistry with 66.9% feeling the need for didactic learning and 94.3% of respondents feeling the need for clinical training on Special Care Dentistry to support services. Conclusion: Dentistry students at the University of Indonesia, Can Tho University, and Khon Kaen University have good attitudes and perceptions of individual patients with disabilities
