.....This study discusses the violation of the cooperative principle. This study aims to explain the violation of maxims and the ways to violate the maxim in the “Gyakuten Saiban Yomigaeru Gyakuten” Game. The theory used in this study is the Theory of Cooperative Principle by Herbert Paul Grice and Jenny Thomas. The analytical method used is qualitative and described descriptively. The technique of collecting data is observing and noting. The data are presented by displaying the background context of the speech, speech in Japanese, romaji, glossing, and Indonesian translation. The results are seventy data on violation of the cooperative principle. The nine data presented in this paper describe every violation of maxims in three ways to violate the maxims. This study concludes that four violations of maxims occur, namely the maxim of quantity, the maxim of quality, the maxim of relation, and the maxim of manner, as well as three ways to violate maxims, namely flouting the maxim, violating the maxim, and infringing the maxim.
