Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=9999920524371&lokasi=lokal>

Abstrak

Analisa dan evaluasi implementasi Program Polisi RW di wilayah hukum Polsek Metro Tambora, Jakarta Barat, sebagai pilot project sejak 2 Maret 2023 lalu memperlihatkan keberhasilannya dalam menekan ancaman gangguan Kamtibmas. Program ini sudah diimplementasikan di seluruh Indonesia secara bertahap, namun untuk wilayah Polda Metro Jaya sudah 100%. Polsek Metro Tamansari, di bawah Polres Jakarta Barat, menjadi lokus penelitian karena gangguan Kamtibmas termasuk tinggi, dipengaruhi oleh banyaknya tempat hiburan malam. Informasi dari laporan kegiatan Polisi RW tersebut dihimpun untuk melihat potensi ancaman pada tiap-tiap RW melalui sistem pelaporan online. Analisis dan penyajian informasi melalui pendekatan teori intelijen dalam bentuk deteksi dini dan cegah dini digunakan untuk memperkuat ketahanan nasional melalui penguatan pada aspek keamanan. Penelitian kualitatif melalui pengamatan mendalam pada kegiatan-kegiatan yang dilakukan oleh Polisi RW 04 Glodok dalam bentuk penguatan keamanan wilayah melalui upaya deteksi dini dan cegah dini adalah implementasi strategi pemolisian prediktif. Strategi pemolisian prediktif ini dapat diperluas pada wilayah hukum Polda lainnya di seluruh Indonesia, khususnya dalam menghadapi potensi ancaman dari gangguan terhadap Kamtibmas.

.....Analysis and evaluation of the implementation of the RW Police Program in the jurisdiction of the Tambora Metro Police, West Jakarta, as a pilot project since March 2, 2023, has shown its success in suppressing the threat of public safety and order disturbances. This program has been implemented throughout Indonesia in stages, but for Polda Metro Jaya it is 100%. The Tamansari Metro Police, under the West Jakarta Police, became the locus of research because the number of security and order disturbances was high, influenced by the number of nightclubs. Information from the RW Police activity reports is compiled into a collection to see potential threats in each RW through an online reporting system. Analysis and presentation of information through an intelligence theory approach in the form of early detection and early prevention is used to strengthen national resilience through strengthening the security aspect. Qualitative research through in-depth observation of the activities carried out by the RW 04 Glodok Police in the form of strengthening regional security through early detection and early prevention is the implementation of predictive policing strategies. This predictive policing strategy can be expanded to other Polda jurisdictions throughout Indonesia, especially in dealing with the potential threat of disrupting public safety and order (Kamtibmas).
