Abstrak

Direktorat Jenderal Bina Usaha Kementerian Kesehatan RI menyatakan bahwa tahun 2020 semua rumah sakit di Indonesia harus sudah menerapkan green hospital, namun di lapangan belum semua rumah sakit yang mengimplementasikan green hospital. Tujuan penelitian ini adalah untuk menganalisis kesiapan RSIA Assalam dalam kesiapan menuju green hospital berdasarkan pedoman Kementerian Kesehatan tahun 2018. Penelitian ini menggunakan pendekatan kualitatif dengan metode studi kasus. Penilaian kesiapan green hospital dilakukan dengan skoring self assessment green hospital Kementerian Kesehatan. Setelah dilakukan penelitian didapatkan hasil bahwa kesiapan green hospital di RSIA Assalam secara keseluruhan mencapai total 50%, dengan perincian kepemimpinan 50%, lokasi dan landscape 50%, bangunan RS 71%, pengelolaan bahan kimia dan B3 54%, pengelolaan limbah 71%, efisiensi energi 7%, efisiensi air 33%, kebersihan lingkungan dan sektor penyakit 80%, pengelolaan makanan 80%, kualitas udara 40%, inovasi lain terkait green hospital 0%, penghargaan bidang kesehatan lingkungan lainnya 0%. Elemen yang memiliki persentase paling tinggi adalah elemen kebersihan lingkungan dan sektor penyakit dan elemen pengelolaan makanan, sedangkan elemen yang memiliki persentase terendah adalah elemen inovasi lain terkait green hospital dan elemen penghargaan bidang kesehatan lingkungan lainnya. Berdasarkan status kesiapan green hospital maka RSIA Assalam berada di posisi brown hospital

.....The Directorate General of Business Development of the Indonesian Ministry of Health stated that in 2020 all hospitals in Indonesia must have implemented a green hospital, but in the field not all hospitals have implemented a green hospital. The purpose of this study was to analyze the readiness of RSIA Assalam in readiness to go to a green hospital based on the Ministry of Health guidelines in 2018. This research uses a qualitative approach with a case study method. The assessment of green hospital readiness is carried out by scoring the Ministry of Health's green hospital self-assessment. After conducting research, it was found that the readiness of green hospitals at RSIA Assalam as a whole reached a total of 50%, with details of leadership 50%, location and landscape 50%, hospital buildings 71%, chemical and B3 management 54%, waste management 71%, energy efficiency 7%, water efficiency 33%, environmental cleanliness and disease sector 80%, food management 80%, air quality 40%, other innovations related to green hospital 0%, Other Environmental Health Awards 0%. The elements that have the highest percentage are elements of environmental hygiene and the disease sector and food management elements, while the elements that have the lowest percentage are other innovation elements related to green hospitals and other environmental health appreciation elements. Based on the readiness status of the green hospital, RSIA Assalam is in the position of brown hospital.
