Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=9999920526887&lokasi=lokal>

Abstrak

Apoteker bertanggung jawab dalam pelayanan kefarmasian di apotek, termasuk dalam pelayanan resep. Oleh karena itu perlu dilakukan pengkajian meliputi monitoring dan evaluasi resep untuk mencegah terjadinya medication error. Penelitian ini bertujuan untuk mengetahui golongan obat hipertensi pada resep, aturan pakai obat hipertensi pada resep, dan interaksi obat hipertensi pada resep. Evaluasi dan monitoring dilakukan dengan cara mengamati dan melakukan kegiatan pelayanan 5 resep di Apotek Kimia Farma No. 382, Depok, Jawa Barat. Hal-hal yang dikaji meliputi cara kerja obat berdasarkan golongan, aturan pakai dan interaksi obat. Hasil evaluasi dan monitoring menunjukkan pemakaian obat sudah tepat dengan memperhatikan golongan obat, aturan pakai dan juga interaksi obat.

Apothecary are responsible for pharmaceutical services in pharmacies, including prescription services. Therefore it is necessary to conduct an assessment including monitoring and evaluating prescriptions to prevent medication errors. This study aims to determine the class of hypertension drugs on prescription, the rules for using hypertension drugs on prescriptions, and the interactions of hypertension drugs on prescriptions. Evaluation and monitoring is carried out by observing and carrying out service activities for 5 recipes at Kimia Farma Pharmacy No. 382, Depok, West Java. The things studied include how drugs work by class, rules of use and drug interactions. The results of the evaluation and monitoring show that the use of the drug is appropriate by taking into account the drug class, the rules for use and also drug interactions
