Abstrak

Jaminan Kesehatan Nasional (JKN) merupakan program dari pemerintah yang memberikan perlindungan kesehatan kepada peserta yang telah membayar iuran atau iurannya dibayar oleh Pemerintah. JKN bertujuan agar peserta dapat memperoleh manfaat pemeliharaan kesehatan dan perlindungan dalam memenuhi kebutuhan dasar kesehatan. Pengelolaan persediaan obat di Apotek perlu dilakukan untuk mendukung pelayanan kepada pasien. Apoteker berperan dalam manajemen sediaan farmasi sehingga harus memiliki kemampuan manajerial untuk mengelola data kebutuhan obat yang dituangkan dalam Rencana Kebutuhan Obat sesuai pagu anggaran. Apotek Kimia Farma 267 Bintaro merupakan salah satu Faskes yang bekerjasama dengan BPJS Kesehatan untuk pelayanan obat Pelayanan Rujuk Balik (PRB). Perkembangan teknologi informasi menyebabkan pengadaan sediaan farmasi menjadi lebih mudah dan cepat. Pengadaan obat dapat menggunakan E-Purchasing melalui Katalog Elektronik pada website Lembaga Kebijakan Pengadaan Barang dan Jasa Pemerintah (LKPP). Pengadaan obat BPJS melalui Katalog Elektronik dapat mempermudah dalam kegiatan melaksanakan kebutuhan obat sehingga pasien dapat menerima obat sesuai dan tepat waktu. Penyusunan laporan khusus ini bertujuan untuk mengevaluasi sistem pengadaan obat BPJS melalui Katalog Elektronik di Apotek Kimia Farma 267 Bintaro. Pengadaan obat BPJS di Apotek Kimia Farma 267 Bintaro menggunakan metode Manual (Offline) yaitu membuat paket pembelian obat berdasarkan Daftar Pengadaan Obat Berdasarkan Katalog Elektronik dengan Formulir 2 dikarenakan kendala operasional. Kendala operasional dalam pengadaan obat BPJS di Apotek Kimia Farma 267 Bintaro telah diselesaikan dengan mengunjungi Kemenkes bagian Pengadaan Barang dan Jasa Kementerian Kesehatan.

.....The National Health Insurance is a program from the government that provides health protection to participants who have paid contributions or whose contributions are paid by the Government. National Health Insurance aims to enable participants to benefit from health care and protection in meeting their basic health needs. Management of drug supplies in pharmacies needs to be done to support services to patients. Apothecary play a role in the management of pharmaceutical preparations so that they must have managerial skills to manage data on drug needs as outlined in the Drug Requirement Plan according to the budget ceiling. Kimia Farma 267 Bintaro Pharmacy is one of the Health Facilities that collaborates with BPJS Health for drug services Referral Services. The development of information technology has made the procurement of pharmaceutical preparations easier and faster. Procurement of drugs can use E-Purchasing through the Electronic Catalog on the website of the Government Goods and Services Procurement Policy Agency. Procurement of BPJS drugs through Electronic Catalogs can facilitate the activities of carrying out drug needs so that patients can receive drugs according to and on time. The preparation of this special report aims to evaluate the BPJS drug procurement system through the Electronic Catalog at the Kimia Farma 267 Bintaro Pharmacy. Procurement of BPJS drugs at Kimia Farma 267 Bintaro Pharmacy uses the Manual (Offline) method, namely making drug purchase packages based on the Drug Procurement List Based on

Electronic Catalogs with Form 2 due to operational constraints. Operational constraints in the procurement of BPJS drugs at the Kimia Farma 267 Bintaro Pharmacy have been resolved by visiting the Ministry of Health, the Procurement of Goods and Services section of the Ministry of Health.</p>
